SKILLS

- Languages: JavaScript (React, NodeJS, Typescript, jQuery), PHP (Laravel, Codeigniter), C# (.NET)
- Databases: MySQL, MSSQL
- Cloud & DevOps: AWS, Alibaba Cloud, Microsoft Azure, Docker, CI/CD Pipelines
- Tools: Git, Jira, BitBucket, Postman, Confluence

WORK EXPERIENCE

Lead Engineer

Jan 2023 – Present

Dapat Vista(M) Sdn Bhd

Kuala Lumpur

- Collaborated closely with the Head of Technology on architecture decisions, technical strategy and product roadmap planning
- Worked cross-functionally with Product Managers and business stakeholders to translate requirements into scalable, maintainable technical solutions
- Managed and mentored a team of 4 developers, driving technical growth, performance improvement and knowledge sharing
- Maintained **99% system uptime across all owned platforms** and **reduced infrastructure costs by 40%** through design optimization across AWS, AliCloud and Azure
- Implemented CI/CD pipelines and enforced code review standards to maintain delivery quality across agile sprint cycles

Full Stack Developer

Mar 2020 – Jan 2023

Dapat Vista(M) Sdn Bhd

Kuala Lumpur

- Delivered an upgraded multi-channel communication platform using Node.js and React with TypeScript to efficiently **process thousands of message requests daily** via portal and API
- Architected a multi-channel payment platform integrating FPX via PayNet, CDM and JomPay for an online bail payment using Laravel and **successfully raised daily bail collections up to RM 1 million**
- Built a real-time admin portal for payment monitoring, bail refund & forfeiture management, **processing with bulk DuitNow service transactions completing in under 2 hours**
- Architected and implemented a RabbitMQ based message queue to handle asynchronous processing of message delivery jobs, improving platform reliability and throughput under high message volumes
- Designed relational database schemas for both the bail payment and communication platforms, covering transaction flows, payment records, audit trails and reporting structures to support operations at scale

Software Engineer

Nov 2017 – Mar 2020

Twistcode Technologies Sdn Bhd

Cyberjaya

- Build a training simulation system on Microsoft HoloLens using Unity game engine to predict, identify, and respond to potential damage conditions in industrial equipment
- Designed and developed a backend API using .Net and MSSQL Server database to store records, ensuring high code quality through rigorous testing and best practices

Application Support Analyst

Oct 2016 – Oct 2017

DHL IT Services (Asia-Pacific) Sdn Bhd

Cyberjaya

- Provided application support and incident management for DHL Asia-Pacific eCommerce application, ensuring system availability and timely resolution of critical issues

CERTIFICATES

Professional Scrum Master I

<https://www.scrum.org/certificates/1051018>

EDUCATION

Bachelor of Computer Science (Game Development)

Multimedia University, Cyberjaya

CGPA: 3.45

2013-2016

Diploma in Information Technology

Universiti Kuala Lumpur MIIT, Kuala Lumpur

CGPA: 2.72

2008-2011
